6000 & 8000

The 8000 desk chairs have the same design and most of the same components as the 6000 range. The difference is the tilting function. The 8000 has a Synchron tilt, where the relationship between the seat and the back is well synchronised for a smooth tilting movement. The 8000 offers many adjustment possibilities and great freedom of choice for composing a personal chair.

Together with its sister the 8000, the 6000 is a real favourite in European offices. Over two million chairs have found their way to satisfied users. One reason for this success is the combination of timeless design, good ergonomics, numerous adjustment possibilities and great freedom to adapt to personal taste. The 6000 features a FreeFloat tilting mechanism with ergonomically correct freedom of movement. There are four different backrests, two seats and two kinds of armrest to choose from. Most combinations are also available with headrests.

FUNCTIONS & OPTIONS

SYNCHRONET™

is a tilt function that allows the seat and back of the chair to move in a carefully balanced relationship, with a smooth pattern of movement. You can adjust resistance in relation to your own weight. The seat can be tilted forward and locked in any position.

FREEFLOAT™

is a tilting mechanism that encourages movement. The seat and the backrest of the chair follow your movements independently of each other. The seat can be tilted forward. Resistance is adapted to your body weight. Locks in any position.

HEADRESTS

Headrests that you can adjust to suit your own tastes and requirements. Adjustable for both height, depth and angle.

ARMREST 2

is adjustable for width and height.

ARMREST 4

can be adjusted for height, width, angle and depth. It is filled with TechnoGel®, a very comfortable elastic polyurethane material.

FIVE-STAR BASE WITH FOOTREST

Most of us rest our feet from time to time on the chair's five-star base. With our textured pattern, the foot gets a better hold and the five-star base keeps its good looks. In addition to black the five-star bases are available in grey or polished aluminium.
