CHALLENGER

tangent

Welcome to CHALLENGER,
a flexible, adaptable,
versatile desking system
for your office.

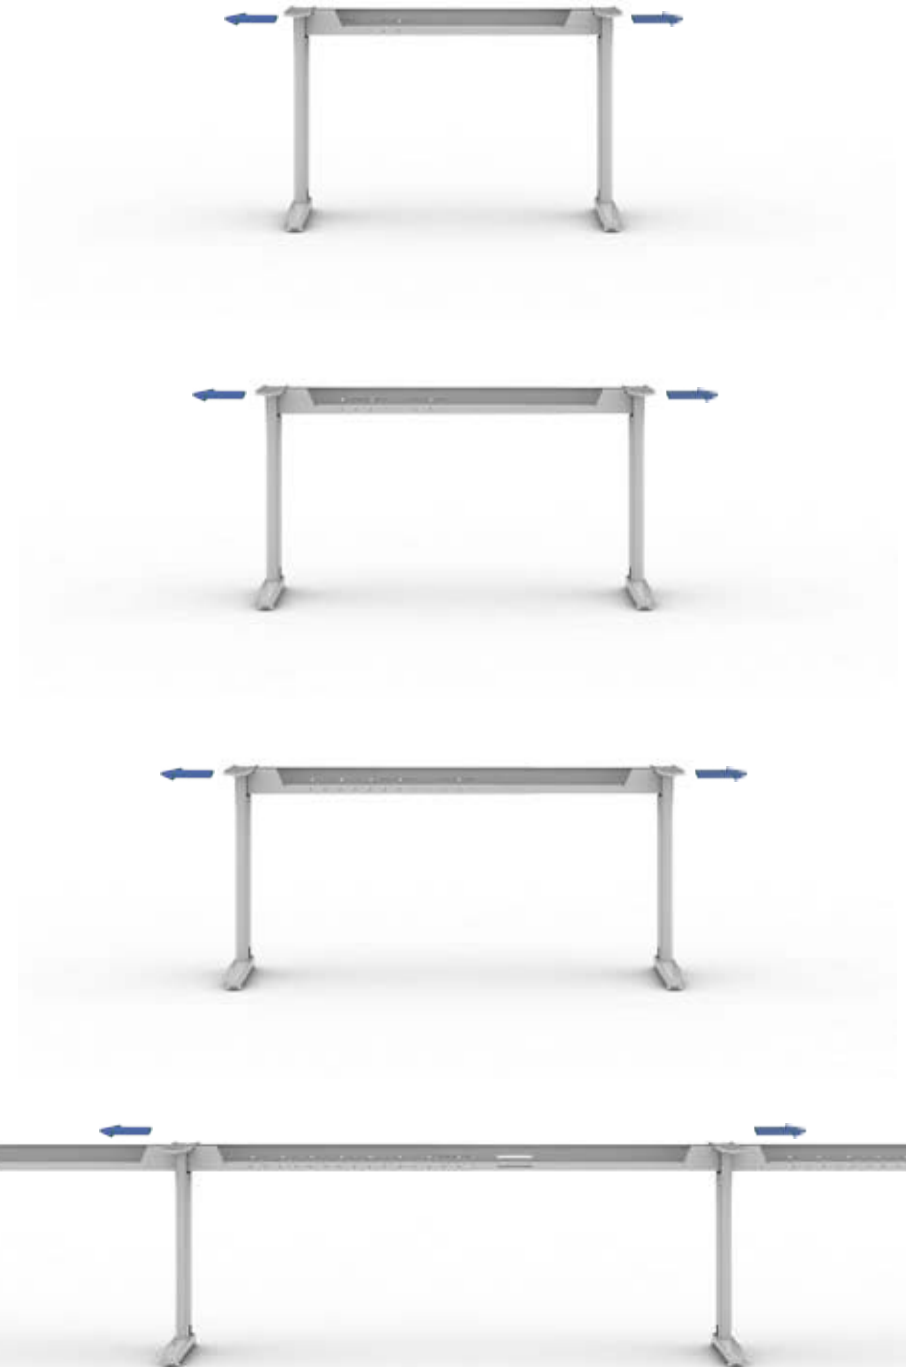

FLEXIBILITY

Companies grow, change, evolve and develop. Your office needs today may not be the same as those of tomorrow.

Challenger is a flexible desking system designed to suit the varied spaces and work patterns within your office today, whilst maintaining the ability to adapt to your requirements tomorrow.

The key to Challenger's flexibility is its adjustable length beam, which not only allows for different size and shape worksurfaces, but makes sharing legs easy and simple, without any need for additional or different components.

CABLE MANAGEMENT

Management of cables is key in today's office.

Challenger's beam and leg frame provide integral and continuous cable management, both vertically and horizontally throughout the system.

Cables are continuously supported as they travel from desk to desk

Challenger rectangular desk

Challenger Workstation Cluster

VERSATILITY

Not every company is the same. Challenger's versatile nature gives organisations the ability to choose from a variety of tops shapes and sizes to suite the aesthetics or functional requirements they wish to achieve.
