

LEED for Commercial Interiors (LEED-CI)

## RH Logic 300/400 gives 5 (or 6) LEED points

LEED for Commercial Interiors offers building owners, tenants, designer and contractors a guideline for creating more efficient, healthier interior spaces that promote comfort and productivity. Points are distributed across 5 major credit categories, where 2 of the categories are relevant for RH.

RH Logic 300/400 contributes to green building projects as follow:

### **Materials and Resources (MR)**

#### **MR 2: Construction Waste Management**

LEED intent: To divert construction and demolition debris in landfills and incineration facilities.

Redirect recyclable recovered resources back to the manufacturing process and reusable material to appropriate sites.

Result: RH Logic 300/400 has defined waste management for 100% (9 % for Energy recovery 91 % for Material recycling) of the product's components and materials.

LEED points: Gives 2 points (out of 2)

#### **MR 4: Recycled Content**

LEED intent: To increase demand for building products that incorporate recycled content materials, thereby reducing impacts resulting from extraction and processing of virgin materials.

Result: The RH Logic 300/400 contains 23 % post consumer recycled materials.

LEED points: Gives 2 points (out of 2)

#### **MR 5: Regional Materials**

LEED intent: To increase demand for building materials and product that are extracted and manufactured within the region, thereby supporting the regional economy and reducing the environmental impact resulting from transportation.

Result: RH products are manufactured in Nässjö, Sweden; Etten-Leur, Netherlands and London, United Kingdom.

LEED points: For building projects within a radius of 500 miles/800km from the RH manufacturing site RH products can contribute to give 1 point (out of 2), but this is dependent on the combined value of construction and Division 12 (Furniture) materials and products that are being used in the project.

### **Indoor Environmental Quality (IEQ)**

#### **IEQ 4.5: Low-Emitting Materials**

LEED intent: To reduce the quantity of indoor air contaminants that are odorous, irritating and harmful to the comfort and well-being of installers and occupants.

Result: RH Logic 300/400 is GREENGUARD certified.

LEED points: Gives 1 point (out of 1)
