

# OBERON

# OBERON

*A table which takes on many shapes with its intelligent design. Individual work. Spontaneous conversations. Planned meetings. A refreshing mix of materials and colours. Sleek table legs. Different top shapes. High functionality. For tasteful and clean aesthetics. And an appealing expression. Ergonomic thoughts. We have called it Oberon after the king of the elves in Shakespeare's A Midsummer Night's Dream. The reason for this is our Oberon is a unique and innovative creation. That is based on classical grounds. On Scandinavian values and craftsmanship.*

## APPEALING AND FUNCTIONAL

Oberon is our profound table range. Where we have infused our view of good and intelligent design. The tables are just as ergonomic, flexible and functional as they are appealing to the eye. They have a stylish finish based on Scandinavian values. Sleek lines and an appealing choice of materials, shapes and colours. Clean surfaces. And ergonomic advantages. The option to alternate between sitting or standing work. There are desks, meeting tables and coffee tables to choose from. Combine a choice of tops and under-frames for the solution that best suits your environment and needs.

#### **CLEAN LINES**

The self-evident basis for Oberon's design is its purity and functionality. Quality and sustainability take centre stage. The table design is sleek and stylish. All tables have the same basic design but have different expressions depending on the material and colour used on tops and legs. Chamfered edges provide a hovering and pleasant finish. The feet and brackets are designed to fit with the narrow legs. Hidden out of sight are stabiliser feet that can be used to cope with uneven floors.

#### **ERGONOMIC ADVANTAGES**

The option to change between a sitting and standing work position means that Oberon can be used in different ways. And for different work assignments. From an ergonomics perspective, it is good to vary between sitting and standing. This gets the blood circulation going and reduces the risk of repetitive strain injuries (RSI). A height adjustable table also lets you find the correct working height when carrying out sedentary work. For simpler height adjustment, Kinnarps has designed a new control unit for the height-adjustable table models. It clearly shows table height in a display and can be programmed to adjust the table to different heights.

FREEDOM TO VARY

**FOR DIFFERENT ROOMS AND EXPRESSIONS**

Oberon offers many possibilities to create different expressions due to its range of tops and underframes. More materials and colours. Figures and shapes. Veneer or laminate. Oak, beech, birch or walnut. Black, light grey or white. With or without a chamfered edge. White, black, silver or chrome-plated underframes. Square or round legs. Numerous options. To find that perfect combination. That fits your environment. For an appealing total solution.

**CUSTOMISED TO YOUR NEEDS**

Oberon is an ergonomic and functional range of table that is easily customised to your needs. It is possible to combine the wide range of tabletops, in different shapes with different underframes in limitless ways. All for flexibility in functionality. The system is designed to offer everyone their own optimal workplace or meeting point. The cornerstone is the stable underframe with a central attachments rail system. Two or more tables can be interlinked using connecting leg frames. The design also allows tables to be scaled down or extended depending on changes to needs and situations.

## DESKS

Desks are an inherent and central part of our working environments. Oberon gives you a flexible and practical platform. Both in terms of design and functionality. Combine underframes with tabletops in different shapes, sizes and materials. Depending on where the desks are to be placed. And in what environment. In open-plan offices, individual offices or activity-based working environments. Based on the finish you are looking for. And the needs of individuals and groups. The stable desks are fitted with durable tops and steady legs. They are also user friendly. With flexible options such as cable management to give tidy surfaces. They are available at fixed heights, as sit/sit and sit/stand models. Combine Oberon with one of our ergonomic and appealing task chairs such as Esencia.

**MEETING TABLES**

Meetings play an increasingly important role in the workplace. We need functionally fitted meeting rooms where we can be creative and discuss issues together. Both spontaneously or planned. The Oberon meeting table is available in many sizes, shapes and solutions. It works for both larger or smaller groups. In meeting rooms or areas where you take a break or drink coffee. Combine with any of our comfortable meeting chairs to create an appealing and functional environment. Designed for dialogue and new ideas.

#### **COFFEE TABLES**

Coffee tables are practical and inviting to gather around. They are available in different shapes and heights. Perfect tables for lounge environments. Standard seat height for meetings and conversations. Or high tables for active or short standing meetings or breaks. Chairs or high stools can be placed around them depending on the type of meeting group or meeting point you want to create.

## FUNCTIONS & OPTIONS

### HEIGHT ADJUSTABLE (SS/SSA)

Sit/stand desks (SS round legs/SSA square legs) are variably height adjustable with the simple press of a button. The desk height is between 615 and 1,275 mm. The powerful motor gives the sit/stand desk immense lift capacity.

### SIT/SIT ADJUSTABLE LEGS (SM/SMA)

The manually adjustable legs (SM round/SMA square) for sedentary work are easy to customise for different users. You can use the crank to raise and lower the tabletop. The adjustable height range is between 615 and 835 mm. Legs with a fixed height of 740 mm (SF) are also available for all tables.

### FIXED HEIGHT PILLAR TABLE (TPM/TPA/TPH)

For meeting tables and coffee tables a pillar base is available with a cruciform base and fixed height. Table height: 740 mm (TPM), 900 mm (TPA), 1,100 mm (TPH).

### CONNECTING LEG FRAMES

Two or more tables can be interlinked using connecting leg frames. Different configurations and functionality is created depending on what tabletops are selected. Connecting leg frames are for table combinations that exceed lengths over 2,200 mm. Available in silver, white, black or chrome finish.

### SQUARE LEGS

Square-shaped legs for an appealing and sleek design.

### ROUND LEGS

Rounded legs for a gentler finish.

## FUNCTIONS &amp; OPTIONS

**SIT-STAND MANUAL CONTROL**

Sit/stand desks can be variably height adjusted with the simple press of a button on the manual control unit that is easy to access on the desk.

**INTELLIGENT SIT-STAND MANUAL CONTROL**

Desks can be height adjusted using an intelligent manual control unit which is available as an optional extra. The desk height in centimetres is clearly visible. All to encourage users to use a height that suits them. The smart memory function can be set to four different heights to suit different users.

**SLIDING TOP**

The desks can be fitted with a sliding top as an optional extra. This gives it a clean and tidy finish as cables and sockets can be easily hidden. Just pull the top towards you to access them.

**LOW NOISE LEVELS**

The powerful motor gives the sit/stand desk immense lift capacity. The motor runs quietly meaning that all adjustments are done without causing any disturbances.

**ADJUSTABLE FEET**

All Oberon tables have adjustable feet to compensate for uneven floor surfaces. The adjustable feet are built into the leg base to give a stylish and sleek finish.

**CASTORS**

Desks can be made flexible and mobile by fitting them with easy-rolling and lockable castors.

## FUNCTIONS & OPTIONS

### COFFEE TABLE GAS PILLAR

Pillar table with adjustable table height.

### COMPUTER MONITOR BRACKET

Flexible and adjustable arm for flat computer monitors. It can be twisted and rotated to make the best possible use of the monitor in your workplace. An iPad holder can also be added to the arm.

### POWER BOX

The cable box has three sockets, USB and network ports as well as a cable trap to ensure that superfluous cables are kept out of sight. This is ideal when the desk is placed against a wall or where two desks are positioned back to back with, for instance, a screen between them.

### CHAMFERED EDGE

A chamfered edge gives the desk a wonderful floating appearance. Chamfered edge available in tops in black, white or grey laminate and oak, beech and birch veneer.

### CPU HOLDER

It is nice to hide the computer away and create space on the desk. This CPU holder is made of a black, broad nylon strap with which you suspend the computer vertically. The CPU holder can be slid, rotated and height adjusted.

### DESKTOP SCREENS

Placing a desktop screen on your desk creates privacy and a balanced noise level around your workplace. Oberon works very well for instance with the Prim or Rezon screens. You can easily create customised solutions for different types of situations and areas. Different screen colour choices also create an appealing interior detail.
